

Engage's domino effect

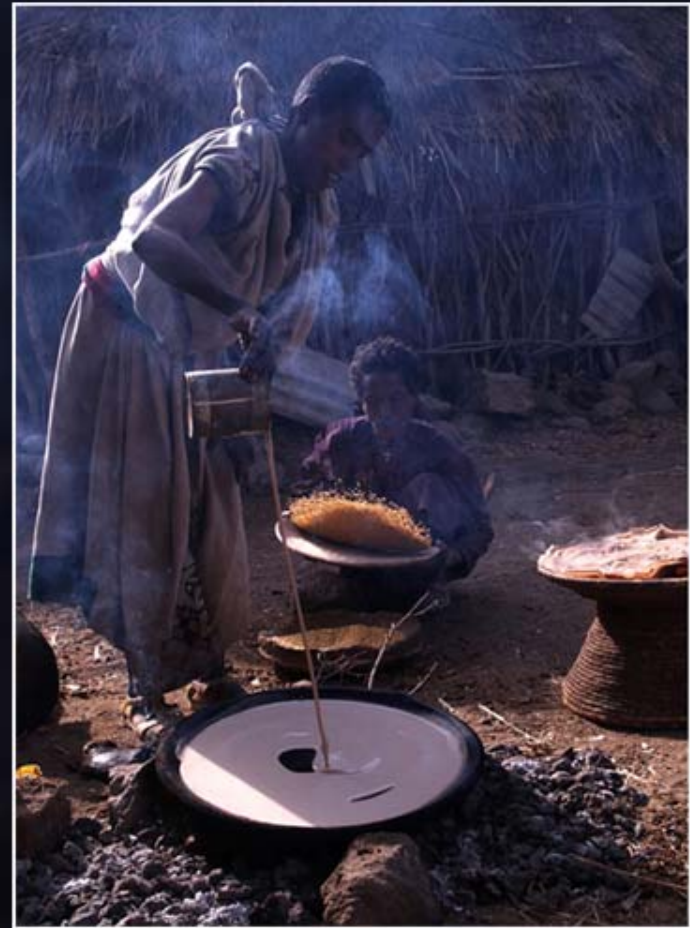

in Ethiopia

The Engage Community gave **\$6,172.73**
to start small businesses in Ethiopia

The average World Vision loan to an individual in Ethiopia last year was \$122.57

That means Engage is giving out 50 loans.

The average World Vision loan is repaid in 6 months.

That means Engage is giving out:

- 50 loans today
- 500 loans in the next 5 years
- 1,000 loans in the next 10 years
- 2,000 loans in the next 20 years
- 5,000 loans in the next 50 years

By the time you retire, this domino effect will affect at least 5,000 families.

And you pushed over the first domino.

Let's continue to pray for Ethiopia as the dominos fall...
